

"Trust, but verify. Every file. Every time."

■ Multi-Algorithm Hashing	■ Court-Ready PDF Reports	■ Metadata Extraction	■ Instant Verification
---------------------------	---------------------------	-----------------------	------------------------

Windows · macOS · iPhone · Android · Fully Offline

Professional Overview

Evidence Integrity Validator is a professional forensic tool for investigators, law enforcement, legal professionals, and cybersecurity teams. It creates cryptographic file fingerprints, extracts hidden metadata, and generates court-ready PDF reports — completely offline.

Feature	Detail	Benefit
■ Hashing	MD5, SHA1, SHA256, SHA384, SHA512, BLAKE2b	Accepted in UK & EU courts
■ PDF Reports	Case ref, examiner, chain of custody, certification	Ready for disclosure & CPS
■ Metadata	EXIF, GPS, camera info, PDF & Office metadata	Discover file origins instantly
■ Verification	Compare against known hashes, auto-detect algorithm	Confirm authenticity in seconds
■ CSV Export	Excel & Google Sheets compatible	Case management integration
■ Offline	Zero network activity. All processing local.	Air-gapped environment safe

Who Needs This Tool

■■■■ Law Firms & Solicitors

Verify disclosed evidence, create audit trails, generate court-ready reports. Scenario: 500 contracts hashed with single PDF report before disclosure deadline.

■ Law Enforcement

Hash seized media on-scene, extract GPS from photos, chain of custody from seizure to court. Scenario: Officer hashes phone images at call-out, GPS places suspect.

■ Private Investigators

Document evidence integrity, verify photo authenticity, extract EXIF metadata. Scenario: Anonymous photos for insurance fraud case — hash verified, GPS extracted.

■ Corporate Security & HR

Evidence-grade records for investigations, verify whistleblower documents. Scenario: Anonymous USB received — hashed and chain of custody documented.

■ Investigative Journalists

Verify leaked documents, create verifiable records, protect against tampering allegations. Scenario: Whistleblower PDFs hashed before opening.

■ Cybersecurity Teams

Hash malware samples, verify software integrity, establish forensic baselines. Scenario: Security patch verified against vendor SHA-256.

Four-Step Workflow

Step	Action	Time
1	■ Drop files into the application	< 1 sec
2	■ Click 'Compute Hashes'	1-30 sec
3	■ Review metadata & verify	10-30 sec
4	■ Generate court-ready PDF	5 sec

Pricing

Tier	Price	Files	Reports
Free Trial	£0	Up to 3	Watermarked
Professional License	£39.99	Unlimited	Clean & court-ready

Lifetime license. Free v1.x updates. No subscription.
